**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Canova, Jr. et al. (US 6,388,870).

Regarding claim 1, Canova, Jr. et al. discloses in Fig. 1G a personal digital assistant with static electricity preventing function, comprising:

a chassis 115 installed in the personal digital assistant serving as the grounding for the personal digital assistant;

a touch panel module 120 installed on the chassis; and

a metallic shielding piece 114 which is installed on the touch panel module and comprises a grounding section 154 on the side, wherein the grounding section 154 comes into contact with the chassis.

Regarding claim 2, the chassis 115 is a metallic chassis (col. 4, lines 20-23).

Regarding claim 3, the chassis being electroplated is a method limitation. The method of forming the device is not germane to the issue of patentability of the device itself. Therefore, since this limitation has not been given patentable weight.

Regarding claim 4, the grounding section clicks into the chassis such that the touch panel module is fixed to the chassis firmly, as shown assembled in Fig. 1A.

Regarding claim 5, the touch panel module comprises a printed circuit area used to contact the metallic shielding piece 150.

Regarding claim 6, the metallic shielding piece is pressure-fixed to the printed circuit area.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Canova, Jr. et al. (US 6,388,870) in view of Lehtiniemi et al. (US 6,466,299).

Regarding claims 7 and 8, the personal digital assistant of Canova, et al. does not show an insulation treated section in the form of a laquer coating. Lehtiniemi et al. teaches using lacquer as a coating in a personal digital assistant (col. 3, lines 45-50). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the lacquer material as taught by Lehtiniemi et al., since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Canova, Jr. et al. (US 6,388,8770), Gabower et al. (US 6,624,432), Watchko et al. (US 2002/0166682) show static electricity preventing housings for personal digital assistants.
